

CREATECH

A Talan[★] Company

MANUFACTURING PERFORMANCE

Operational Performance Improvement

- > Reduce Your Response Time
- > Eliminate Waste
- > Efficiently Increase Your Plant Capacity

OPTIMIZE TO BETTER COMPETE

Today's reality of a global marketplace results in ever increasing cost pressures on manufacturers. Createch understands these issues and has the expertise to help manufacturers better control costs through reducing lead times, eliminating waste and by introducing Lean Manufacturing initiatives. Hands-on manufacturing know-how and the ability to transfer knowledge to customers provide a winning combination to help manufacturers improve their performance and competitiveness.

GROWTH MANAGEMENT

- > Manufacturing process analysis
- > Manufacturing strategy development
- > Production capacity growth
- > Plant layout

ENHANCED COMPETITIVENESS

- > *Lean Manufacturing* implementation
- > Daily Management System implementation
- > Planning and Scheduling process optimization
- > Improvement of operations efficiency
- > Changeover/setup time reduction (SMED)
- > Reduction of material losses

CONTINUOUS IMPROVEMENT

- > Training of internal continuous improvement teams
- > Kaizen
- > Performance measurement and dashboards

SHERPA^{MC}

Based on the operating system of Pratt & Whitney Corp., a world leader in continuous improvement, the SherpaTM approach can be adapted to companies of all sizes and sectors, including manufacturing, distribution or service.

ORTEMS

Advanced Planning and Scheduling Solutions help manufacturing companies to optimize their production by reducing delays and controlling their costs. These solutions quickly compute precise scheduling within the constraints of material, personnel, equipment and stock availability.
